PROFESSIONAL SUMMARY

Lead Unity Developer with 15+ years building and scaling high-performance mobile, PC, and multiplayer games for millions of players worldwide. Specializes in Unity architecture, multiplayer systems (Photon, Mirror), and LiveOps-driven development.

Track record of boosting performance up to 40%, cutting crash rates by ~50%, and driving 60% player growth on titles including PAC-MAN, School of Dragons, and StarChef. Skilled at leading engineering teams, architecting scalable systems, and owning game development end to end. Currently seeking a full-time Lead / Principal Unity Engineer role.

TECHNICAL LEADERSHIP & ARCHITECTURE

- Design scalable Unity architectures for multiplayer and live-service games
- Lead and mentor teams of 4-8 developers, setting coding standards and best practices
- Build reusable gameplay frameworks, cutting feature development time by ~35%
- Own end-to-end delivery: architecture, development, optimization, and deployment
- Drive up to 40% performance gains and improved stability across multiple titles

CORE SKILLS

Programming Languages: C#, C++, Java

Game Engines: Unity (2D/3D, URP, Addressables, ECS/DOTS)

Web Technologies: HTML, CSS, JavaScript, ASP.NET

Databases: SQL Server

Networking: Photon, Mirror, Custom MMO Frameworks

Platforms: iOS, Android, Windows, Mac, Steam, WebGL

Tools & Technologies: Git, Jira, Xcode, Visual Studio, Jenkins, CI/CD

Other: Analytics & Monetization SDKs, LiveOps Systems, Agile / Scrum

PROFESSIONAL EXPERIENCE

Freelance Unity / Software Developer — Remote, India

Independent Contractor | Apr 2025 - Present

- Deliver Unity game development and technical consulting to independent clients
- Build gameplay systems, multiplayer features, and performance optimizations for mobile and PC Unity projects
- Develop supporting backend tools and dashboards using HTML, CSS, JavaScript, and SQL Server
- Advise clients on architecture design, debug complex Unity issues, and improve performance

SuperGaming — Pune, India

Lead Game Developer | Apr 2020 - Feb 2025

- Led development of multiple Unity mobile titles for iOS and Android, owning architecture, optimization, and deployment
- Built reusable gameplay frameworks, cutting feature development time by 35%
- Improved runtime stability and frame rate across devices, cutting crash rate ~50%
- Mentored a team of five developers and set code standards for maintainable systems
- Integrated ads, analytics, and LiveOps SDKs, lifting user engagement and monetization

JumpStart Games — Bangalore, India

Senior Software Engineer | Dec 2016 - Mar 2020

- Developed cross-platform features for School of Dragons, an MMO with 500K+ daily active users
- Shipped frequent live updates with zero regressions using modular gameplay scripting

- Improved multiplayer sync and backend efficiency, cutting mobile network latency 25%
- Partnered with global product and QA teams to support continuous live-ops releases

99Games — Udupi, India

Lead Game Developer | May 2015 - Nov 2016

- Led Unity migration of StarChef, unlocking Android expansion and future console readiness
- Managed a six-member team building features, UI systems, and monetization loops
- Introduced pipeline optimizations, cutting build iteration time by 40%

Digit88 Technologies — Bangalore, India

Senior Game Programmer | Sep 2014 - Apr 2015

- Built high-performance mobile games for iOS and Android using Unity and custom toolchains
- Stabilized frame rates and optimized draw calls to support low-end devices

Dhruva Interactive — Bangalore, India

Senior Game Programmer | Dec 2011 - Sep 2014

- Core team member on Maya the Bee: Flower Party from concept to launch; reached #1 in Kids category in 70+ countries
- Architected gameplay systems in close collaboration with art and design for a cohesive player experience
- Optimized performance across Android, iOS, Microsoft, Yandex, and Amazon devices
- Developed and maintained multiple mobile titles, coordinating with international publishers on quality releases

Early Career — Hyderabad, India

Mobile Game Developer, Version2Games | *Software Developer, Vimukti Technologies* | Feb 2010 - Nov 2011

- Solo-developed iOS ports of PS3 titles and indie projects, matching gameplay and performance parity (Version2Games)
- Built mobile applications for Symbian, BlackBerry, and iOS (Vimukti Technologies)

KEY PROJECTS

- PAC-MAN (Unity, iOS/Android) — Optimized mobile adaptation, improving stability across 2M+ installs
- School of Dragons (Unity MMO) — Added live-ops, multiplayer sync, and progression systems for 500K+ DAU
- StarChef (Unity, iOS/Android) — Led Unity port and cross-platform release, expanding reach 60% and build speed 40%
- Maya the Bee: Flower Party (Unity) — Built core gameplay systems and led device optimization; reached #1 Kids ranking in 70+ countries

EDUCATION

Bachelor of Technology (B.Tech) — Electronics and Communication Engineering

Gayatri Vidya Parishad College of Engineering, Visakhapatnam | 2004 - 2008

ADDITIONAL INFORMATION

- Skilled in remote collaboration, Agile development, and multi-platform pipelines
- Currently exploring Unity 6 ECS/DOTS, multiplayer backends, and AI-assisted workflows
- Focused on building scalable, performant, player-first gaming experiences
